

Cover Letter - N/A (Not specified in the job description)

Dear [Hiring Manager Name], I am writing to express my enthusiastic interest in the Data Scientist and AI Engineer position advertised at [Company Name]. Having closely reviewed the job description, I am confident that my skills and experience align strongly with the requirements, and I am eager to contribute to your team. As a recent graduate of the National Polytechnic School with a specialization in Data Science and Artificial Intelligence, I possess a strong foundation in machine learning, deep learning, and natural language processing. My internships at Holcim Lafarge Algeria, Société Générale Algeria, STEPPOST, and SAIDAL have provided me with practical experience in developing and deploying AI solutions to address real-world business challenges. For example, at Société Générale, I developed predictive models for customer segmentation using Python, scikit-learn, and PyTorch and deployed a RAG-based chatbot. I am particularly excited about the opportunity to apply my skills in [mention specific area of interest from the job description, e.g., developing predictive models, working with large datasets, building AI-powered applications]. My project experience, including developing a job recommendation system and automating business report generation with LLMs, demonstrates my ability to leverage cutting-edge technologies to create impactful solutions. My strong analytical skills, proficiency in languages such as Python, SQL and C++, frameworks such as PyTorch, Scikit-learn, and experience with DevOps tools like Docker and Git, make me a well-rounded candidate for this role. I am a quick learner, a collaborative team player, and I am passionate about leveraging data to drive innovation. Thank you for your time and consideration. I have attached my resume for your review and welcome the opportunity to discuss my qualifications further in an interview. Sincerely, Yahia FERARSA
